

Going Beyond Text Complexity: Considering text-task scenarios in understanding comprehension

Sep 26, 2013 in Webinar

Dr. Sheila Valencia, University of Washington

With the implementation of the Common Core has come a welcomed emphasis on comprehension. In addition to focusing our attention on close reading and deep understanding, the CCSS has focused our attention on the role of text complexity in comprehension. In this webinar, Dr. Valencia presents an expanded way of considering the relationship between comprehension and text complexity by examining text-task scenarios.

For more information on Dr. Valencia, please visit her [faculty website](#) at the University of Washington.

Registration details will be available as the date of the webinar approaches.
